

## Summit Reservoir and Shasta Pumping Plant Replacement Update

Dear Neighbors,

EBMUD is replacing the 37 Million Gallon Summit Reservoir, built in 1898, and replacing it with a 3.5 Million Gallon partially buried tank. EBMUD is also building a new pumping plant to replace the current outdated plant. EBMUD will landscape the site and add a walking path along Grizzly Peak at the end of the project. This project is scheduled to be completed in early 2017.

EBMUD's contractor will bring in equipment and temporary office space to the Summit Reservoir site in mid to late December.

In January EBMUD will begin excavation and prepare the foundation for the 400,000 gallon temporary tank that will supply water during the main reservoir demolition and reconstruction. This process will take several months.

During the next several months activity, noise and construction traffic around the site will be noticeable. Standard Work hours are Monday through Friday 7:00 am to 6:00 pm.

For more information about this project go to [www.ebmud.com](http://www.ebmud.com). Select Construction Projects and scroll down to Berkeley or Kensington to select the project. If you have questions, please contact Michelle Blackwell in Community Affairs at (510) 287-2053 or [mblackwe@ebmud.com](mailto:mblackwe@ebmud.com).
